Research Interests

My research lies at the intersection of statistical machine learning and causal inference called *counterfactual learning*. I am interested in the counterfactual nature of logged bandit feedback obtained from interactive systems, and ways of using biased real-world data to achieve safe automated decision making in the wild.

Education

2021 - Cornell University
Ph.D. Student in Computer Science
Research Field: Counterfactual Evaluation and Learning, Fairness in Ranking

2016 - Tokyo Institute of Technology
2021 B.Eng. in Industrial Engineering and Economics
Research Field: Counterfactual Inference, Off-Policy Evaluation, Information Retrieval

3. **Yuta Saito** and Thorsten Joachims. Counterfactual Evaluation and Learning for Recommender Systems: Foundations, Implementations, and Recent Advances. In *Proceedings of the 15th ACM Conference on Recommender Systems (RecSys)*, 2021.

Awards

2022	Forbes Japan 30 Under 30 2022
2022	WSDM 2022 Best Paper Runner-Up Award
2021	NeurIPS 2021 Outstanding Reviewer Award

Scholarships

2022 -	Masason Foundation Fellowship
2021 - 2023	Funai Overseas Scholarship Doctoral research fellowship by the Funai Foundation (a private foundation in Japan). Granted two full years of tuition plus a monthly stipend of \$3,000 for living expenses.

Involved Research Projects

- **Open Bandit Project** (<https://github.com/st-tech/zr-obp>)
Open Bandit Project is an open-source research project that aims to enable realistic and reproducible experiments on bandit algorithms and their off-policy evaluation. The project consists of a large-scale real-world dataset called *Open Bandit Dataset* and Python software called *Open Bandit Pipeline*. Awarded **The Prime Minister's Award for Open Innovation by the Japanese Government**.
